

## **PROJECT EXPERIENCE**

### **Project Name and Location**

Distribution System Study  
Town of Smyrna, Delaware

### **Owner**

Town of Smyrna  
27 South Market Street Plaza  
P.O. Box 307  
Smyrna, DE 19977

### **Description of Services Provided**

An integrated distribution system review and analysis study was performed for the Town of Smyrna, Delaware, to determine the condition of the existing system and the impact of anticipated rapid residential and commercial load growth on the Town's electrical system. Load growth projections were developed and the potential impacts from known and anticipated future developments were evaluated with regard to existing substation and distribution circuit capabilities. A comprehensive report was developed for the Town Management and Council with forecasted capital requirements. This work was carried out between August 2003 and September 2004 and involved \$10 million of approved capital system upgrades.

### **Additional Questions?**

We are here through every step of the process, including the information gathering stage. In fact, we understand this to be one of the most important aspects of locating a consultant capable of handling your project.
