## **PROJECT EXPERIENCE**

### **Project Name and Location**

Distribution System Study  
City of Seaford, Delaware

### **Owner**

City of Seaford, Delaware  
414 High Street  
P.O. Box 1100  
Seaford, DE 19973-1100

### **Description of Services Provided**

An integrated distribution system review and analysis study was performed for the City of Seaford, Delaware, to determine the condition of the existing system and the impact of anticipated rapid residential and commercial load growth on the City's electrical system. Load growth projections were developed and the potential impacts from known and anticipated future developments were evaluated with regard to existing substation and distribution circuit capabilities. A comprehensive report was developed for the City Management and Council with forecasted capital requirements. This work was carried out between May 2006 and September 2006 and involved \$27 million of approved capital system upgrades.

### **Additional Questions?**

We are here through every step of the process, including the information gathering stage. In fact, we understand this to be one of the most important aspects of locating a consultant capable of handling your project.
